PASS: 40%

Credit-2

OBJECTIVE

To enable participants to apply financial concepts practically through workshops, case studies, and project analysis, thereby demonstrating a clear understanding of financial accounting, corporate finance, and investment management principles.

COURSE OUTCOME

CO1 Demonstrate practical application of financial concepts.

CO2 Conduct financial analysis using appropriate techniques.

CO3 Develop project reports with financial recommendations.

CO4 Present and defend financial findings effectively.

CO5 Integrate ethical and informed financial decision-making skills.

Suggested Content

1. Seminar Topics

Participants may choose from topics that allow practical application of course concepts:

- **Financial Statement Analysis of a Company:** Understanding profitability, liquidity, and solvency.
- **Capital Budgeting Decisions in Indian Companies:** Evaluating investment decisions using NPV, IRR, and payback period.
- **Application of Time Value of Money:** Personal finance planning, retirement planning, and corporate project evaluation.
- **Risk Management Strategies for Investments:** Assessing risk-return trade-offs, diversification, and hedging strategies.

2. Project Report

The project should showcase hands-on analysis and financial decision-making skills:

- **Analysis of a Selected Company's Financial Health:** Using ratio analysis, cash flow evaluation, and trend analysis.
- **Case Study on Investment Planning and Evaluation:** Assessing investment options and financial strategies.
- **Calculation of Financial Metrics:** NPV, IRR, Payback Period, ROI, and other relevant ratios.
- **Recommendations:** Actionable insights and suggestions based on financial analysis.
