CO	Course Outcome
CO1	Identify and select a relevant topic from the semester courses and demonstrate conceptual clarity and subject understanding through focused academic inquiry.
CO2	Develop the ability to organize ideas, prepare structured academic content, and present them effectively through a professional PowerPoint presentation.
CO3	Strengthen analytical, interpretative, and communication skills through discussion, presentation, and interactive academic engagement.
CO4	Exhibit independent thinking, creativity, and confidence in explaining and defending ideas in a seminar-based learning environment.

SYLLABUS:

- Selection of a relevant topic of interest from the courses offered in Semester I.
- Preparation of a PowerPoint presentation on the selected topic, demonstrating in-depth understanding and conceptual clarity.
- Evaluation of the student's comprehension and analytical ability through discussion and interactive assessment.

Objective: To promote thinking and creativity among students as they participate in the discussions. The interactive environment ensures a much deeper understanding of the topic.

Pedagogy:

- Individual presentation of seminar topic.
- Use of PowerPoint (PPT) for presentation.
- Interactive discussions.
